PROJECT

Acorn Gas is providing the City with a 1,000 gallon Liquefied Petroleum (LP) Autogas dispenser. As part of this Project, Acorn Gas agrees to provide a pump and motor, electrical conduit, a micron filter and all related installation and maintenance services to make the LP tank fully operational and function.

Acorn will detach the existing 1,000 gallon LP tank from its fittings and move it to an area in close proximity designated by the City so that the old tank can be retrieved by its owner. Acorn will then supply and install a new 1,000 gallon LP tank, which is will own but rent to the City for its use. The cost of the contract presumes the gate surrounding the existing tanks is wide enough to change out the tank using skates. If this method cannot be used and removal of all or part of the enclosure surrounding the tank is required or special equipment must be rented, Glendale shall pay any additional costs incurred in removing and installing the LP tank.
